

Serial Break-in Box GF SENT SER BKBX

Advanced RS 232 Data Capture unit, enables

failsafe in-line capture of any serial data:

Mouse, tracker-ball, keyboard

or touch-screen.

- Ultra-low heat and power.
- Lossless data pass through.
- Highly reliable, hardware only solution.
- No impact on the systems being recorded.
- Up to three serial streams can be captured in synchronisation.

Green solution

With possibly the lowest power consumption of any capture system, Sentinel Break-in box does not require an external power supply or contain any hazardous materials. The unit is fully RoHS compliant.

Safety

Solid state hardware solution:

- Non-intrusive, serial data capture.
- Serial data can be captured anywhere.
- Supports redundant system architectures.

Life cycle benefits

High reliability solution providing

- Low cost of ownership.
- Unobtrusive and simple installation.

Specification

| Model | GF SENT SER BKBX |
|--------------|-----------------------------------|
| Data format | RS 232 |
| Sampling | Up to 115K bps. |
| Installation | In line with existing connectors. |
| Power | None |
| Noise | 0 dB (silent operation). |
| Size | W 208 x L 207 x H 29 mm |
| Weight | 500 g. |
| MTBF | 191,000 hours (calculated). |
| Compliance | CE, FCC and ROHS class B. |
| MTBF | 191,000 hours (calculated). |
